DESCRIPTION

The Magtrol MBB-02 Miniature Force Transducer is designed for measuring very small loads. Made entirely of aluminum for very high measurement stability, this transducer features built-in high-capacity overload protection. For more flexibility, force can be applied to the transducer in one of two positions.

APPLICATIONS

The small dimensions of the MBB-02 permit its adaptation to numerous small and precision applications (watchmaking, for example), as well as long-term dynamic measurements.
