
ZB Series Load Cells

FEATURES

- 10 kg to 1000 kg (100 N to 10 kN)
- Approved for use in calibrated weighing systems (PTB Test Report)
- Hermetically sealed case (IP 67)
- Made of stainless steel
- Appliances for easy assembly
- Compatible with products of well-known manufacturers
- 6-wire configuration
- EU approval

DESCRIPTION

The load cells of the **ZB** series have been designed for use under industrial conditions in hybrid type weighing systems up to Class III, for which calibration is obligatory. Made entirely of stainless steel, they are an excellent choice for weighing systems in the foodstuff industry. The sensing element itself is a twin-bend design with metal foil strain gauges. A metal folding bellow welded over this unit forms a hermetically sealed chamber, which when filled with dry nitrogen constantly ensures stable measuring characteristics irrespective of environmental influences. There is a second hermetically sealed chamber containing components for compensation and adjustment, which are required for

the exact setting of the guaranteed technical parameters. The load cell is for measuring tensile or pressure forces. The assembly appliances, which will be delivered as a separate order, include an integrated overload protection, thus enabling the user to integrate the load cell in his weighing system without any problem or safety risk. As a standard, the load cells are equipped with a 3 m connection cable. It is a matter of course that these load cells, after calibration in N, can also be supplied as high-precision force transducers up to the accuracy class 0.05%. Moreover, the load cells can be supplied with an integrated amplifier (model **ZB-E**). The output voltages (0 to 10) V or (0/4 to 20) mA can be selected.

* According to VDI 2637

** According to VDI 2638

Option : The transducers can be delivered with an internal amplifier delivering an output signal of 0(4) - 20 mA or 0 - 10 V within precision classes 0.2 and 0.5.

PIN CONNECTIONS
Pin

Supply voltage (+)	brown
Supply voltage (-)	green
Measuring voltage (+)	red
Measuring voltage (-)	white
Sensing line (+)	grey (In 6-wire configuration only)
Sensing line (-)	blue (In 6-wire configuration only)
Shield	black
Cable length	3 m

Note : In the ZB-E type cells, the pins for supply voltage (-) and measuring voltage (-) are interconnected internally.

MOUNTING INSTRUCTIONS

When being loaded, the load cells and force transducers of the ZB type series are slightly deflected in the measuring direction at the end where load or force is introduced. This is why these transducers must be so mounted that this deflection will not any case be limited or inhibited within their range of operation.
